PROJECTS

Portflect: Smart Portfolio Analyzer

portflect.com

A smart portfolio tool that helps developers understand why they're not getting interviews.

- Analyzes what recruiters actually engage with and provides actionable, data-driven insights to help developers improve their portfolio visibility.
- Built to bridge the gap between a developer's work and what hiring managers actually look for during the interview process.

Bookit : AI Powered Hotel Booking Application

bookit-frontend-production.up.railway.app

Book a Room. Manage your Stay. Do it all smoothly with Bookit.

- Built a full-featured AI-powered booking application enabling users to reserve rooms, manage stays, and handle the complete reservation-to-checkout flow seamlessly.
- Implemented core features including room reservation, welcome drinks, car rental, resort & spa, and free WiFi service management.
- Delivered a clean, responsive frontend focused on giving guests complete control of their stay.

PROFESSIONAL EXPERIENCE

Frontend Developer Jun 2023 – Present

Mshel Homes Ltd · Abuja, Nigeria

- Led end-to-end development of the company website (mshelhomes.com), driving a 60% increase in lead generation through improved UX and performance.
- Designed an Expense Management System with real time dashboard, smart filters, and multi-level payment approval workflows, reducing manual data entry by 70%.
- Co-developed an HR Appraisal Dashboard that cut appraisal processing time by 59%, adopted company-wide.
- Contributed to a CRM system that improved customer response times by 35%.
- Led a small frontend team on the Asset Management System project, conducting code reviews and defining component architecture standards.

Frontend Developer Mar 2025 – Dec 2025

Zuvo Tech · Remote (Concurrent contract alongside full-time role at Mshel Homes)

- Built the Green Light web application (greenlightmusicpub.com), enabling African musicians to create, manage, and monetise music catalogues.
- Delivered a fully responsive Vue.js frontend integrated with RESTful APIs, supporting catalogue management, rights tracking, and publisher workflows.

Frontend Developer (Contract) Jul 2023 – Aug 2023

TAIAS (TITA) · Nigeria

- Designed and delivered a university admin dashboard that improved administrative efficiency by 50% through streamlined data entry and reporting interfaces.

Frontend Developer Aug 2022 – Mar 2023

Hoolio · Nigeria

- Built a fully functional investment platform and an AngularJS powered e-commerce site supporting multiple vendors with product listings, cart, and checkout flows.
- Mentored a cohort of junior developer interns providing structured code reviews, weekly 1:1 sessions, and curated learning resources to accelerate their onboarding.

Frontend Developer (NYSC) Oct 2021 – Oct 2022

NITDA — National Information Technology Development Agency · Nigeria

- Developed ICT company registration software that reduced user complaints by 65% through an intuitive multi-step form flow and real-time validation.
- Assisted in upgrading legacy desktop systems, eliminating 10+ hours per week of manual administrative work.

EDUCATION

B.Sc. Computer Science 2020
Madonna University, Nigeria

National Youth Service Corps 2021 – 2022
NITDA, Abuja
